PROJECTS

Mini Project : Title: BLUETOOTH HOME AUTOMATION

"Bluetooth Home Automation" is a project focused on designing and implementing a system that allows users to control home appliances wirelessly via Bluetooth-enabled devices. It ensures seamless and efficient operation of connected devices using simple commands through a mobile app or similar interface.

Major Project : Title: KIDNEY STONE DETECTION USING DEEP LEARNING

Detecting kidney stones using deep learning involves applying advanced neural network techniques to medical imaging, such as CT scans, ultrasound, or X-rays. Deep learning models, especially Convolutional Neural Networks (CNNs), excel at image analysis, making them ideal for this task. Here's a structured approach to kidney stone detection using deep learning.
