WORK EXPERIENCE

Software Engineer(frontend)

Amunik (Clokam Project) Aug 2024 – Feb 2025

- Lead the development and maintenance of frontend components for a community website using ReactJS.
- Designed and implemented user interfaces where community members can create events, join events, and interact seamlessly.
- Integrated APIs to handle dynamic data, including event creation, member management, and real-time updates.
- Optimized the application for performance, responsiveness, and cross-browser compatibility.
- Collaborated closely with designers and backend teams to ensure an engaging and functional user experience.

Frontend Developer

AbleAura Nov 2022 – Jul 2024

- Designed and developed responsive and user-friendly e-commerce web pages using ReactJS, HTML, and CSS.
- Integrated RESTful APIs to fetch and display dynamic data, ensuring seamless interaction between frontend and backend.
- Optimized web applications for performance and cross-browser compatibility.
- Collaborated with designers and backend developers to implement scalable solutions for business requirements.
- Conducted occasional manual testing to ensure functionality and usability before production release.

SKILLS

- Frontend Development: ReactJS, HTML, CSS, JavaScript, API Integration, Responsive Design.
- Web Optimization: Cross-browser compatibility, performance tuning, and accessibility enhancements.
- API Integration: Fetching and displaying dynamic data using RESTful APIs.
- Version Control: Git, GitHub.
- UI/UX Collaboration: Translating design mockups into interactive and responsive user interfaces.
- Accessibility: Basic WCAG compliance, screen reader testing, and keyboard navigation implementation.
- Tools: Visual Studio Code.
