Project Details

Detecting Fake Profiles In Social Media By Using Machine Learning Key

.At present social network sites are part of the life for most of the people. Every day several people are creating their profiles on social network platforms and they are interacting with others independent of the user's location and time. The social network sites not only providing advantages to the users and also provide security issues to the users as well their information. To analyze, who are encouraging threats in social network we need to classify the social networks profiles of the users. From the classification, we can get the genuine profiles and fake profiles on the social networks.

.**Keywords:**Machine Learning,Natural Language Processing,Classification
