Percentage : 72.16%

Skills

- Python
- Data Visualization
- EDA
- SQL
- Statistics
- Problem Solving Skills

Projects

IMDb Database SQL Project

- 1. Database Design:** Designed a relational database schema to store IMDb data, including tables for movies, directors, actors, genres, and ratings, and established relationships between them.
- 2. Data Import and Querying:** Imported IMDb data into the database and wrote SQL queries to extract insights, such as top-rated movies, popular actors and directors, and genre-specific trends.
- 3. Insight Generation:** Used SQL queries to gain insights into the IMDb data, including identifying patterns and trends in movie ratings, actor and director performance, and genre popularity.

Bengaluru House Price Prediction Insights.

- 1. Model Accuracy:** Machine learning models like Multiple Linear Regression and Linear Regression achieve accuracy scores of around 84-86% in predicting house prices.
- 2. Influencing Attributes:** Key attributes like area, BHK, and number of bathrooms significantly influence house prices in Bengaluru.
- 3. Future Trends:** Bengaluru's property market is expected to grow, with predicted price increases of 20-30% by 2030 and 25-32% in areas like Begur Road and Whitefield by 2035.
