- Excellent communication, presentation, and reporting skills; a proactive team player.

Education

2019 **B.Sc**
Sant Gadge Baba Amravati University

Professional Experience

2022/10 – 2023/01 **Backend Developer**
Pericius Pvt. Ltd.

Project Name : Digital Resource Management
Domain : Digital Transformation
Client : Technotree

Project Description:The Digital Resource Management (DRM) system streamlines the management of digital assets such as content, applications, and licenses across platforms. It provides end-to-end lifecycle management, enhancing operational efficiency and reducing resource wastage. The solution offers centralized control, enabling real-time tracking, allocation, and optimization of digital resources while ensuring compliance with organizational policies and standards.

Roles And Responsibility:

- Building and maintaining robust backend services to manage digital resources, ensuring high performance and scalability.
- Designing efficient database schemas, writing optimized queries, and ensuring data integrity for resource allocation and utilization.
- Creating and maintaining RESTful APIs for seamless integration with frontend applications and third-party services.
- Implementing secure authentication, authorization mechanisms, and adhering to compliance standards for digital asset management.

- Collaborating with cross-functional teams to debug, resolve issues, and deploy enhancements.

2020/07 – 2022/09

Backend Developer

QuinStreet Software Pvt. Ltd.

Project Name : Storenic

Domain : E-commerce

Client : Otto Group, Germany

Project Description: Online Shopping is a lifestyle e-commerce web application which contains various collection of luxurious products. This project allows viewing various products available and enables registered users to purchase desired products from the list and there are different payment options. Also ability to track the order, cancel product, return, etc.

Roles And Responsibility:

- Minimizes risk, prepares for risk mitigation and keeps the project on track.
- Manages user requirements; provides timely project updates.
- Contributing in all phases of the Software development lifecycle.
- Managing Java and Java EE application development. Writing well-designed, efficient, and testable code.
- Conducting software analysis, programming, testing, and debugging.
- Analyzes codes to find causes of errors and revise program as needs
- Provides feedback for performance appraisals of team members.
- Delivering high availability and performance.
