Career Objective:

Seeking a challenging position in an organization where my knowledge and skills will be fully utilized and where the challenging role will further my professional development.

Internship/Projects

Project 01: School Management System

Methodology: Agile

Tools used: JIRA, Power BI & Tableau.

Role: Junior Business Analyst

Description: Developed a School Management System to streamline admissions, attendance, exams, and fee management for improved efficiency.

Key responsibilities:

- Interacted with the **stakeholders** (Client and IT team) to gather, clarify, and define all the requirements through elicitation Techniques.
- Created user stories with appropriate acceptance criteria with the assistance of Product Owner. Maintained product backlog using JIRA tool.
- Prioritized the requirements using **Moscow** techniques. User stories are validated as per DOR checklist.
- Prepared prototypes and **wire frames** to ensure proper functionality of each user story.
- Participated in sprint planning, daily Scrum, **Sprint review** and Sprint Retrospective meetings and worked on eliminating bottlenecks with the assistance of the Scrum Master.
- Worked closely to prepare **Product Burn Down** and **Sprint Burn Down charts** to discuss progress and address impediments with stakeholders.
- Actively participated in planning and running Quality Assurance and User Acceptance Testing to successfully deliver each sprint component.

Project 02: Inventory Management System

Methodology: Waterfall

Tools used: MS Excel, MS Word, MS Visio, Axure, Balsamiq

Role: Junior Business Analyst

Description: Inventory Management System to automate stock tracking, expiry management, and order fulfillment across multiple warehouses.

Key responsibilities:

- Under assist of Sr.BA Developed Business Case Document based on **Enterprise analysis**.
- Interacted with Stakeholder to gather requirements using **elicitation Techniques**. Under assist of Sr.BA Created BRD, Use case specification document, and activity diagram. Transformed Business requirement into FRD.
- Worked closely with the Business stakeholders and technical team to create Business flow, and **SRS**. Then created prototypes and wire frames using Axure tool. Collaborated with design engineer to create Design document. Organized JAD session to clarify the queries of the team.
- Created **Test Case Scenarios**, and worked closely with QA team and User for UAT processes, then actively participated in deployment process and prepared project closure document. And got the Sign off on the documents.
