12th:
H.P.T Arts And R.Y.K Science
College, Nashik
Nashik
Percentage: 82.00%

2013

10th:
Fravashi Academy
Nashik
Percentage: 80.33%

Certifications

- Lean Six Sigma Green Belt by KPMG

Projects

- B.E. Project: A machine learning model for toxic comment classification

Rohan Nikumbh

Summary

Analytical professional with technical knowledge, experience and critical thinking skills to thrive in data-driven environments. Tackles challenges with positivity and drive to overcome.

Experience

OMP – Consultant

June 2024 – Present

- Created Epic/User Stories based on the client requirements
- Created the roadmap for implementation of requirements, **prioritizing requirements** and deciding user stories for upcoming sprints
- Created **Use-Case Diagrams, Activity Diagrams** and Data Flow Diagrams to visualize client processes

HDFC Bank - Functional Analyst (Internship)

Apr 2023 – June 2023

- Governed multiple projects across the vertical which involved making crucial decisions about projects, ensuring that the projects are completed according to standards, and tracking progress and accountability.
- Prepared a newsletter encompassing comprehensive **data analysis** & project highlights across the vertical. The analysis encompassed project completion timelines and vulnerabilities, & ticket resolutions completed within the designated timeframes
- **Collaborated** with **multiple teams** within the vertical, scheduled meetings between them and resolved ticket ownership queries

Persistent Systems - Software Engineer

Aug 2019 – Nov 2021

- Data Pipeline (Python) - Developed a **Python-based data pipeline**, consisting of various stages of data processing. Optimized script performance within the pipeline, devised multiple validation scripts for database and file system data. Wrote **SQL** queries to optimize and efficiently retrieve data.
- Website (Java-Angular) - Created Java-based APIs & employed Mockito for unit testing. Executed manual deployment of the Java application onto the server, conducted comprehensive system testing, & efficiently identified, documented, & resolved issues.
- Lead the team in the development of applications by **capturing client requirements, conducting in-depth analysis**, and successfully delivering the final solution to the client within the specified timeframe
- Documented project flow, details of all the scripts involved, flow of data processing, details of the testing flow and website details

Extra-Curricular Activities

- Member of Alumni Committee out of 200 students at SIMSREE- Managing 4500+ Alumni Relations and seamless functioning of internal and external communication, hosting and organizing alumni meets, batch meets and panel discussions
- Elected as House Captain at SIMSREE House cup and managed 50+ students through various sports
