Question 1 – Functional Requirements. Answer – Functional Requirements.

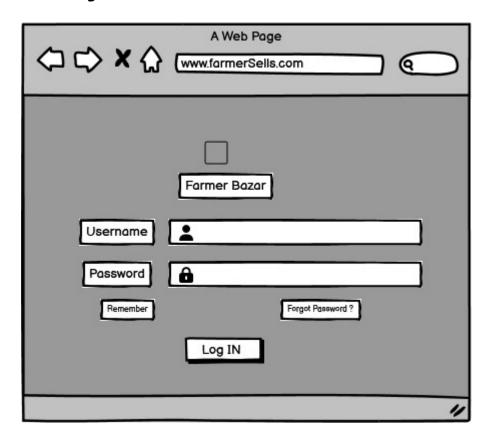

Req ID	Requirement Name	Requirement Description	Priority
FR001	Farmer Registration	Farmers from remote areas register on the app to access agricultural products and services.	8
FR002	Farmer Search for Products	Farmers search fertilizers, seeds, pesticides by name, category, or company for easy purchase.	8
FR003	Product Catalogue	Displays listed products from manufacturers for farmers to browse with details like type, price, and quantity.	7
FR004	Shopping Cart	Farmers add selected products to cart, review, modify quantities before purchase.	7
FR005	Payment Processing	Facilitates secure online payments enabling farmers to pay using available payment methods.	7
FR006	Order Management	Farmers can track orders, view status updates, and manage purchases through the app.	6
FR007	Product Review and Ratings	Farmers provide feedback, rate products helping others choose quality products from trusted manufacturers.	6
FR008	Wishlist	Farmers can save frequently needed products for future purchases without searching again.	4
FR009	Shipping and Delivery	Ensures products are delivered to farmers' doorstep in remote areas with tracking facility.	4
FR0010	Return and Refund Policy	Farmers can return unsatisfactory or damaged products and request refunds as per policy.	5
FR0011	Add to buy later	Allows farmers to save products they plan to buy later, ensuring easy access.	5
FR0012	Order ID	Generates unique order ID for	6

		each purchase to track and manage orders efficiently.	
FR0013	Product Offers	Displays ongoing discounts, offers on seeds, fertilizers, pesticides helping farmers buy at lower prices.	4
FR0014	Customer Support	Provides farmers access to customer care for queries, order issues, or product-related concerns.	7
FR0015	Email Confirmation	Sends confirmation emails for farmer registration, orders, payment, and delivery status updates.	6
FR0016	Invoice	Generates detailed invoices post- purchase including product details, taxes, and payment status for farmer records.	5
FR0017	Print Invoice	Farmers can download and print invoices for accounting or subsidy purposes.	4
NFR001	Performance Efficiency	Application should load pages, search results, and transactions within 3 seconds under normal conditions.	8
NFR002	Security	Farmers manage profile, address, payment details, and view order history within the app.	8
NFR003	Availability	Must ensure secure transactions, protect user data, and comply with data privacy standards (SSL, encryption).	5

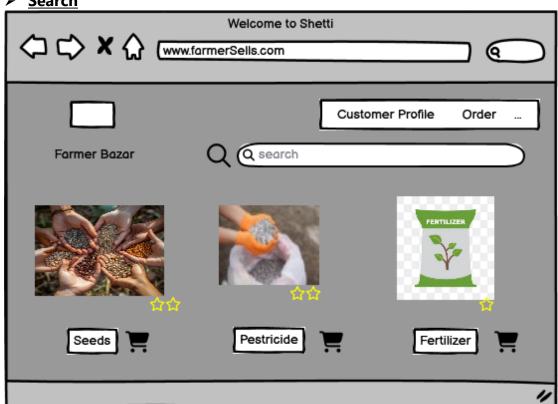

Question 2 – Minimum 5 Page Designs

Answer – Page Designs

Question 6 - Database Design Answer- Database Design

Question 7- Data Flow Design Answer - Data Flow Design

Question 8 - Change Request Answer - How to handle change request

- Document the Change Request Change in Government Taxation Structure.
- Take Approval from Project Manager or Change Manager for analyzing the change request.
- Analyse the Change Request Perform Feasibility Study to accept the change.
- Impact analysis to measure the change I.e., how the change in government taxation structure would in scope or out scope the budget of ongoing project and how it will affect the company finances.
- Effort Estimation to implement the change in project.
- Then we will help the stakeholders to understand the impact the change request will have on the organization and to help minimize the negative impact that results from that change.

- Articulate a realistic vision of how the Change in Government Taxation
 Structure would help in CSR Activities or help the company save money from reduced taxes.
- Communicate a state of urgency to stakeholders and bring them to an agreement and avoid conflicts which could delay the project.

Question 9 – Change Request vs an Enhancement

Answer – In this Case adding crop yields and selling them and auction system for crop yields to the application is an enhancement as it involves adding new features to the system.

As a Business Analyst we would document the requirements, and work with the development team to determine the feasibility and impact of the new features. We would also consider the potential benefits, risks and costs associated with the enhancement before making any recommendation to the client.

Question 10 – Estimations

Answer - Man-hour estimations:

- -500-1000 Man-hours as this is a medium project.
- PM: -150 MH
- BA-150 MH
- JAVA DEVELOPER-100
- MH TESTERS-80 MH
- NW ADMIN-120 MH
- DB ADMIN- 120 MH

Total Man-hour estimation: - 720 Man-hours.

Total Man-hour estimation: - 720 Man-hours.

Question 11 – UAT

Answer – User Acceptance Testing Process

- Planning In this state, Blueprints are made to implement UAT for every feature that needs to test and minimum standards for accepting the test.
- Designing Here the Test Cases are designed to hide all the possibilities of software packages in a real-world environment.
- UAT Testers A Testing Team consisting of end users that meet the criteria for implementing testing. The End Users must have expertise in subject matter, the ability to report the problem.
- Bug Fixing Whatever Bugs are found in UAT Testing, the development team should work on them and make the software error free.
- Sign Off After removing all the bugs, the testing team indicates acceptance of the completion of the bugs. In this Phase, all the stakeholders conclude that the software is ready to go live and sign it off.

Question 12 – Project Closure Documents

Answer – Project Closure Documents The BA should keep the following into consideration during project closure: -

- Did the project achieve its goal.
- What were the planned and actual cost.
- What was the estimated time vs actual time taken to complete the project.
- Was there proper documentation and record of the same.
- Was the testing successful.
- Was the training session conducted successfully
