The vision of this project is to increase employee efficiency and provide maximum customer satisfaction by addressing challenges related to customer inquiries, document duplication, payment failures, DSA/Partner management, and disaster recovery, while offering benefits like document management, performance tracking, real-time reporting, compliance management, and increased efficiency.

TARGET GROUP:

MARKET SEGMENT: Bajaj Housing Finance provides loans to people who want to purchase a home. This project started to cover the process and ensure a smooth flow. This product belongs to the debt market, where consumers buy a home by borrowing a loan from the company.

TARGET USERS: This app is made for the employees to manage their day-to-day task and their clients' data it helps manage documents and loan origination. Customer can also use this app to check their EMI and loan amount.

NEEDS:

PROBLEM FACED BY EMPLOYEES:

- Customer Enquiry: It is difficult to track the customer inquiry. What kind of problems customers face.
- Document Duplication: Sales Manager uploads the same document many times. It isn't easy to analyze the customer profile.
- Payment Failure: Sometimes customers don't pay the EMI at a fixed date. So it is difficult to get payment on time.
- DSA/ Partner Management: Difficulty in tracking Onboarding DSAs, tracking referrals, and calculating commissions.
- Disaster Recovery & Business Continuity: Plans and systems should be in place to ensure data integrity and system availability in the event of disasters, with minimal downtime.

BENEFITS OF THIS PROJECT:

- Document Management: Manage the document so that it can easily accessible to every employee who are working on it.
- Track Performance: Employers can track the performance of employee so that they can provide incentives and give them some suggestions on their performance.
- Reporting and Analysis: Provides real-time insights into loan portfolio performance and customer behavior trends.

- Compliance Management: Automates compliance checks and reporting, ensuring adherence to RBI guidelines and other laws.
- Increase efficiency: By removing duplicity and availability to all resources helps to increase the efficiency of employees.
- Loan origination System: Reduces processing time by up to 70%, from days to hours.

PRODUCT:

PENNANT APP: This application helps manage documents and customer data. It helps employees analyze customer requirements and eligibility for loans. It also helps track the status of applications and loan amounts disbursed. It gives employees performance reports. Customers can also raise any queries they have.

FEATURES OF THIS PRODUCT:

- Document Management: Manage the document so that it can easily accessible to every employee who are working on it.
- Track Performance: Employers can track the performance of employee so that they can provide incentives and give them some suggestions on their performance.
- Reporting and Analysis: Provides real-time insights into loan portfolio performance and customer behavior trends.
- Compliance Management: Automates compliance checks and reporting, ensuring adherence to RBI guidelines and other laws.
- Increase efficiency: By removing duplicity and availability to all resources helps to increase the efficiency of employees.
- Loan origination System: Reduces processing time by up to 70%, from days to hours.

FEASIBILITY OF THIS PROJECT:

It is feasible to develop the project by considering the following points.

TECHNICAL FEASIBILITY

- Customer Tracking
- Document Management
- Payment Tracking
- DSA Management
- Disaster Recovery
- Performance tracking

RESOURCES FEASIBILITY

- Budget
- Scrum Team
- Timeline

LEGAL FEASIBILITY

- Compliance Requirement
- Risk Mitigation

RISK ANALYSIS:

- Requirement Changes
- Third Party Dependencies
- Data security

BUSINESS GOAL:

The goal of this is to increase the efficiency of employees and provide maximum satisfaction to the customer. It also helps to track the customer's past behavior so it will be easy to analyze the existing customer. It also helps to generate reports and do analysis.

BUSINESS MODEL:

Bajaj Housing Finance target retail customer who wants consumer loan, home loan, credit card, and other small loan. Most of their loans are taken by their existing customers. This is because when they come in contact with any of their customers they make a relationship with them by being in touch with them by sending emails and offers.

They have optimized their SEO in such a way that if a customer searches for anything related to Bajaj finance then their company website is on the top. Which makes the customer come back on the same page.

They have different revenue streams like small medium-sized enterprises loans, rural loans, commercial loans, and charges for their services. They also provide their customer with different products and services like consumer finance, SME finance, commercial lending, lending. Bajaj finance has also been using digital marketing like optimizing its SEO and showing its website on all its customer's related searches.

DOCUMENT 4: AGILE PO EXPERIENCE

I have done a market analysis and found the following points.

- **Customer enquiry management:** Businesses increasingly adopt CRM (Customer Relationship Management) **systems** to improve inquiry tracking. Al-driven chatbots and automated ticketing systems are becoming standard for handling inquiries.
- **Document Management**: Employees manually upload multiple versions of the same document, leading to inefficiency. Al-powered duplicate detection are becoming essential for businesses.
- **EMI Payment Tracking**: Customers fail to make timely EMI payments, leading to revenue leakage. RBI's mandate for digital payments compliance has increased demand for automated EMI reminders and tracking solutions.
- **Disaster Recovery**: System downtime affects customer experience and compliance. RBI and GDPR compliance mandates have forced companies to invest in secure data backup solutions.

Enterprise Analysis:

DUE Diligence on Market Opportunity:

- Integrated Approach: Unlike traditional CRMs, this solution combines customer inquiries, document management, EMI tracking, and DSA management in one platform.
- Cost-Effective for SMBs: Aimed at small to mid-sized businesses that cannot afford high-end solutions like Salesforce.
- Automated Compliance & Security Features: Unlike competitors, the solution provides built-in compliance management as per RBI & legal regulations.
- Cloud-Based & Scalable: Can be deployed as a SaaS model, making it scalable for growing businesses.

As project owner, I have prepared a vision statement and roadmap for this project.

Vision and Roadmap:

- Vision Statement:
 - "To develop an integrated system that enhances employee productivity and customer satisfaction by efficiently managing customer inquiries, documents, payments, DSA/Partner onboarding, and ensuring business continuity."
- Roadmap Highlights:
 - o Phase 1: Customer Inquiry Tracking and Document Management
 - o Phase 2: Payment Tracking and DSA/Partner Management
 - o Phase 3: Disaster Recovery, Compliance, and Reporting Features
 - Phase 4: Performance Tracking and Incentive Management

Backlog Management:

The Product Owner (PO) creates and maintains the Product Backlog, prioritizing user stories based on business value and user needs. For this we prepare sprints.

- Registration
- Customer Detail
- Loan Detail
- Status
- Basic Detail

Stakeholders Collaboration

We involve all stakeholders like sales team Customer supports Finance Manager DSA IT Admins and Business Leaders.

We also take regular feedback and communicate changes according to the requirement.

Sprint Planning and Review.

I also prepare sprint with the help of developer team and define the goal and also gather feedback from them so that we can make changes if required.

Daily Follow up

Meet daily with the team and ensure that work will go with the flow without any hurdle and ensure that team will remain align with the project goal.

Performance Tracking

Track employee performance to offer incentives and suggest performance improvements. Provide real-time insights into loan portfolio performance and customer behavior trends.

Compliance Management:

Ensure adherence to RBI guidelines and other regulatory requirements

Tools Used

In this project, I have used JIRA and MS Excel for reporting and tracking performance

In Scrum, a product owner serves as the liaison between multiple areas of an organization. This person communicates with business stakeholders and collaborates closely with Scrum teams to keep all areas of the business informed on a project's development.

The product owner develops a vision of a product's function and operation, which in turn allows this Scrum team member to define product features and break those features into product backlog items.

CHALLENGES FACED

- Customer Enquiry: It is difficult to track the customer inquiry. What kind of problems customers face.
- Document Duplication: Sales Manager uploads the same document many times. It isn't easy to analyze the customer profile.
- Payment Failure: Sometimes customers don't pay the EMI at a fixed date. So it is difficult to get payment on time.
- DSA/ Partner Management: Difficulty in tracking Onboarding DSAs, tracking referrals, and calculating commissions.
- Disaster Recovery & Business Continuity: Plans and systems should be in place to ensure data integrity and system availability in the event of disasters, with minimal downtime.
