CAREER OBJECTIVE:

Aspiring Business Analyst with an Engineering background and Practical knowledge of Business Analysis techniques and tools. Passionate about transforming business needs into actionable solutions through effective requirement gathering and stakeholder collaboration. Seeking an opportunity to contribute to impactful digital projects.

PROFILE SUMMARY:

- Good understanding of SDLC methodologies including Waterfall and Agile (Scrum) frameworks with practical project exposure.
- Proficient in preparing BRD, FRD, SRS, RACI Matrix, RTM, and creating UML diagrams and wireframes using tools like Visio and Balsamiq.
- Skilled in eliciting, analysing, and documenting requirements through interviews, workshops, and document analysis.
- Hands-on experience in Agile practices: writing user stories, adding Acceptance Criteria, conducting Sprint Planning, and maintaining Product Backlog.
- Familiar with supporting UAT, handling Change Requests, and using tools like JIRA, MS Excel, and Power BI for tracking and reporting.

PROJECTS:

1. **Project Name:** E-Commerce Solution for Customer & Order Management |Agile|

Project Description: An online customer and order management system enabling seamless user registration, order placement, real time tracking, and item-wise processing, replacing manual handling with automated workflows for improved efficiency and accuracy.

Role: Business Analyst

Responsibilities:

- Gathered and documented functional and non-functional requirements from stakeholders.
- Involved in Creating user stories.
- Designed wireframes and screen mockups using Balsamiq tool.
- Created Sprint Burndown Chart using JIRA tool

2. **Project Name:** Railway Reservation System: Ticket Booking & Cancellation |Waterfall|

Project Description: A web-based Railway Reservation System enabling real-time ticket booking, seat availability checks, and automated cancellation and refund processes for both i-tickets and e-tickets to enhance user experience and operational efficiency.

Role: Business analyst

Responsibilities:

- Gathered business requirements and documented them in the Business Requirement Document (BRD)
- Designed process flow diagrams and use case diagram using MS Visio to visualize booking and cancellation workflows.
- Involved in creating Use case Specification Document
- Participated in creation of functional specifications and ensured alignment with business goals.
