

Assignment – 2

Subject: Introduction – Business Analyst for Your Project

Dear Client,

I hope you're doing well.

My name is Nallamothu Harish, and I'll be working with you as the Business Analyst for your project. I'll be your main point of contact to understand your business needs, gather requirements, and help ensure the solution we deliver meets your expectations.

To get started, I'll soon set up a meeting with you and your team to understand your goals, current process, and any challenges you are facing. This will help us plan the project in the right direction.

Please feel free to reach out to me at any time if you have questions or need support. I'm looking forward to working with you.

Best regards,

Nallamothu Harish

Business Analyst

Business Requirements Document (BRD)

1. Project Title

Online Store Web & Mobile Application

2. Background / Business Need

With the rise of e-commerce, the company wants to create an online platform where customers can browse products, place orders, and make payments. This will expand customer reach, reduce dependency on physical stores, and improve convenience.

3. Project Objective

- Develop an online platform (website + mobile app) to sell products.
- Enable product search, ordering, payment, and delivery tracking.
- Increase customer base and sales via digital transformation.

4. Scope

In Scope:

- User registration and login
- Product catalog browsing
- Shopping cart and checkout
- Online payment integration

- Order history and tracking
- Admin dashboard for inventory and orders

Out of Scope:

- International shipping
- Vendor registration or multi-vendor support (initial phase)

5. Stakeholders

- Product Owner
- Business Analyst
- Development Team
- QA Team
- Marketing Team
- End Users (Customers)

6. Assumptions

- Internet access is available to all users.
- Users have basic digital literacy.
- All required product data will be available from the business team.

7. Constraints

- Project must be completed in 3 months.
- Budget is limited to ₹10,00,000.
- Must comply with Indian e-commerce and data protection laws.

8. Key Performance Indicators (KPIs)

- User signups per week
- Number of successful orders
- Bounce rate on product pages
- Order fulfillment time
- Customer satisfaction ratings

 Software Requirements Specification (SRS)

1. Introduction

This document outlines the functional and non-functional requirements for an Online Store application.

2. System Overview

A responsive web and mobile platform for browsing, purchasing, and tracking products online.

3. Functional Requirements

3.1 User Module

- Register, Login, Logout
- Update Profile, Change Password

3.2 Product Module

- View product catalog
- Search and filter products
- View product details

3.3 Cart & Checkout Module

- Add/remove products to/from cart
- Checkout process
- Apply discounts/coupons

3.4 Payment Module

- Integrate with payment gateway (UPI, card, net banking)
- Generate invoice post-payment

3.5 Order Module

- View past orders
- Track delivery status

3.6 Admin Module

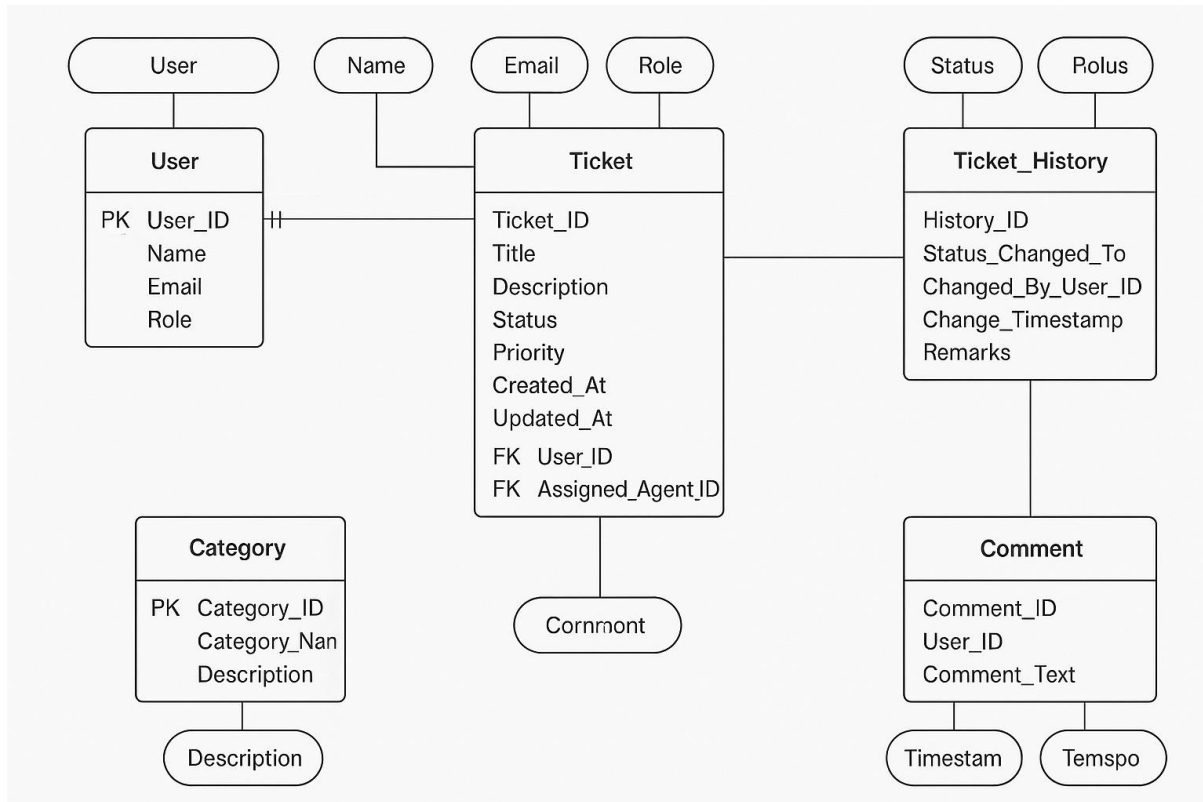

- Add/edit/delete products
- Manage orders
- Manage users
- View reports

4. Non-Functional Requirements

- **Usability:** User-friendly UI
- **Performance:** Load within 3 seconds
- **Security:** SSL encryption, secure login
- **Scalability:** Should support up to 1 lakh users
- **Availability:** 99.9% uptime

5. System Interface Requirements

- Payment gateway
- SMS/Email service provider
- Shipping partner API (optional)

4. User Story Shopping
