PROJECTS

Track Mate

Methodology: Waterfall

Role : Business Analyst

Conducted requirement elicitation through stakeholder interviews, surveys, and document analysis.

Developed Business Requirement Document (BRD), Functional Requirement Document (FRD), and Use Cases to define system functionality.

Created Activity diagram, process flow charts, and wireframes and prototypes to illustrate system processes.

Collaborated with cross-functional teams (developers, testers, and project managers) to ensure requirements alignment.

Assisted in requirement analysis, system design, and feasibility studies to evaluate technical and business impacts.

Supported the Quality Assurance team by preparing test cases, reviewing test plans, and assisting in UAT to ensure system quality.

Style studio

Methodology : Agile Scrum

Role : Business Analyst

Defined and prioritized product backlog items, ensuring alignment with business goals.

Collaborated with stakeholders to gather and refine requirements for a multi-vendor fashion marketplace.

Created detailed user stories, acceptance criteria, and process flows to enhance system functionality.

Coordinated with cross-functional teams, including developers and designers, to ensure seamless sprint execution.

Facilitated sprint planning, backlog grooming, and daily stand-ups as a Product Owner.

Ensured timely delivery of project milestones while managing risks and dependencies.
