WORK EXPERIENCE

- **Associate Business Analyst |Shivrai Technologies Pvt Ltd | Oct 2019 – Nov 2024|Pune, India**
  - Spearheaded the analysis and implementation of the system across locations such as Egypt, UAE, and India, leveraging agile methodologies throughout the project lifecycle to ensure adaptability.
  - Conducted requirement gathering sessions by engaging with business stakeholders to understand and analyse their needs, identify use cases for business processes, define functional requirements, and develop detailed user stories within an Agile/Scrum framework.
  - Converted complex business requirements into clear technical and functional specifications, ensuring alignment with organizational goals and technical capabilities.
  - Acted as the primary link between business and IT teams, effectively presenting technical concepts from use cases and project updates to non-technical stakeholders.

- Produced comprehensive documentation, including process flows, user stories, and functional specifications, presented clearly and traceably throughout the project lifecycle.
- Coordinated the QA/UAT process to ensure solutions aligned with business requirements and met expected outcomes.
- Developed requirement models and effectively communicated and tracked them throughout the SDLC.
- Managed evolving requirements and change requests within an agile environment.
- Proven experience in facilitating Scrum events, including product backlog grooming sessions.
- Extensively utilized tools such as Balsamiq, Axure, DevOps, MS Visio, Lucid charts, Draw.io and Word/Excel.
