Hi Nidhi/ Team ,

I had joined the 2nd August Batch and have attended Induction session as well. Please note this feedback is related to the Doubt session attended till now. What I have experienced in this session is that the way of communication is way different from the Theoretical class.

In the theory classes, the interactions were innovative and the topics were taught keeping in mind that all students might not be from IT Background.

Please refer below pointers on the Doubt clearing session:

- 1.Many topics are beyond our Logic palate and have to be made understood with Real life examples for our better understanding.
- 2.There is no Audio provision for such classes. I understand that in Theory class also we didn't have the same. But it is very difficult to convey our doubts with messages.

Please understand this is not a Complain, rather a request from my end to have the Doubt clearing session in such a manner that a Non IT background person should also understand such Topics.

I am quite committed to the Course and want to learn and understand the Topics instead of just knowing them in Theory.

I am looking forward for your support .

Thank You

Regards

Devika Vipradas
