Hi All,

Interview Invite for L1 discussion from **Xorient** team will be shared by tomorrow e.o.d. Please be assured and don't block your Xorient committed slot for any other Interview / meeting / task.

Please Note :- Keep your photo ID card (any ID proof) softcopy in your system and present it at the start of the Interview. Kindly ensure that the image or document is clear.

-

Interview Guidelines

Please note that the interview will include a coding assessment using an IDE, which is expected to be taken seriously. To ensure a smooth and productive session, the following minimum requirements must be met at the start of the interview. If these criteria are not fulfilled, the client may need to discontinue the interview process.

Required Setup:

- Screen and video sharing must be enabled, with a clear microphone and audio setup.
- The candidate must have a fully functional IDE installed and ready for use. This includes the ability to write, run, and debug code during the assessment.
-

Important:

In previous interviews, some candidates had installed an IDE but had not verified its functionality—resulting in issues such as licensing errors, missing .NET libraries, or failure to run even a basic "Hello World" console application. Please ensure your environment is properly configured and tested in advance.
