EXPERIENCE

Academor

Web Development and Design Intern

- Developed responsive web pages and applications during a two-month internship program.
- Worked on mini and major projects, including 'Historical Places in India' and 'Weather Forecasting Application'.

Webcook Software Solutions

Web Development Intern

- Acquired practical experience in developing web pages and applications.
- Completed three projects: Personal Portfolio Website, Calculator, and Todo Application.

PROJECTS

Student Result Management System

- Developed a user-friendly grocery delivery website, enabling customers to conveniently order essentials.
- Implemented secure database management for storing and retrieving student results.
- Enhanced system usability by designing an intuitive user interface for administrators.

Grocery Delivery Application

- Developed a user-friendly mobile application for grocery delivery, enabling customers to order essentials.
- Implemented features such as store selection, product browsing, shopping cart management, and payment processing.
- Optimized application performance to ensure seamless user experience.

Driver Drowsiness Detection

- Developed a real-time Driver Drowsiness Detection system using OpenCV and MediaPipe.
- Implemented EAR-based analysis to detect prolonged eye closure and alert users with sound and email notifications.
- Integrated location and snapshot features in email alerts for enhanced safety.
