SKILLS

- Java 8+, Java 21
- Spring Boot, Spring MVC, Spring Security, Spring Data JPA
- Git / GitHub
- IntelliJ IDEA / Eclipse
- Maven / Gradle
- JUnit / UnitTesting
- Hibernate / SQL/MySQL
- REST API / RESTful Services
- Java Streams / Stream API
- Lambda Expressions
- Multithreading
- Agile / Scrum
- JIRA

LANGUAGES

- English (Fluent)

CERTIFICATES

- Java Full Stack Developer from Kodnest Technologies
- Backend Application Development course from IBM

PROFILE

Java developer with 2 years of experience in building and maintaining web applications using Java, Spring Boot, and RESTful APIs. Seeking to contribute to a dynamic development team where I can enhance my backend skills, work on scalable solutions, and grow into a full-stack or system design role.

WORK EXPERIENCE

Somerset Limited 2023-2025
Java Backend Developer

- Developed and maintained RESTful APIs using Spring Boot and Java 8+, enabling seamless client-server communication.
- Integrated backend services with SQL databases (MySQL/PostgreSQL) using Hibernate and Spring Data JPA.
- Designed and analyzed ER diagrams to define relational data models and ensure efficient database structure.
- Used Java Stream API, Lambda expressions, and functional programming paradigms to write clean and performant code.
- Applied OOP concepts, interfaces, and SOLID principles to build modular, reusable, and testable components.
- Debugged and resolved application issues using IntelliJ IDEA, breakpoints, and application logs.
- Optimized complex SQL queries and used joins, aggregations, and stored procedures for performance tuning.
- Wrote and maintained unit tests and integration tests using JUnit and Mockito for high test coverage.
- Participated in Agile Scrum practices including daily stand-ups, sprint planning, and retrospectives using tools like JIRA.
- Documented APIs using Swagger/Postman, enabling smoother frontend-backend collaboration.
- Used Postman for API testing and validation during development.
- Employed Git and Bitbucket for version control and collaboration via pull requests and branching strategies.
- Familiar with JWT-based authentication, API security, and role-based access control (RBAC).
- Collaborated cross-functionally with UI/UX, QA, and DevOps teams to ensure timely and bug-free releases.
- Hands-on experience with DTOs, ModelMapper/MapStruct for efficient object conversion.
- Basic understanding of microservices architecture, Docker, and REST principles.

EDUCATION

Bachelor of Engineering 2018 - 2022

KLE Institute of Technology, Hubli | Visveswaraya Technological University
