Summary

Results-driven QA Engineer with 3.6+ years of experience in test planning, automation, defect tracking, and QA metrics. Skilled in functional and regression testing, ensuring high-quality software delivery. Strong problem-solver and team player with excellent communication skills.

Skills

- **Manual Testing Proficiency** - Web, Mobile (IOS and Android), API, Cross browser Testing, Accessibility Testing
- **API Automation** – Postman tool
- **Defect reporting tool** - Jira
- **Frameworks** - Cucumber, TestNG, WebDriver IO
- **Languages** – Java, TypeScript
- **Other Software Tools** - Adobe analytics, Perfecto, Splunk
- **Automation Testing proficiency** - Selenium web driver, Appium
- **CI/CD Tool** - Bamboo
- **Query language** - SQL
- **Test Cases** - QTest
- **IDE's** - Visual Studio Code, IntelliJ Idea, Eclipse
- **OS** - Windows
- **Code Repository** - Bitbucket, GitHub
- **UX Design Tools** - Zeplin, Figma.
- **AI/Automation tool** – GitHub Copilot.

Experience and Projects

- **UST Global** April 2025-Current
 - ✓ Quality Assurance Engineer
- **Project: Dental Health Tracking and Engagement System**
 - ✓ Conducted end-to-end testing of the dental health tracking app to ensure accurate daily logging of brushing and flossing activities.
 - ✓ Performed functional, regression, and UI testing on a newly developed calendar feature to ensure seamless user experience and correct data tracking.
 - ✓ Automated test cases for core features, enhancing test coverage and reducing manual testing time during regression cycles.
 - ✓ Developed and executed comprehensive test strategies, identifying and reporting defects, ensuring high-quality software delivery.
 - ✓ Validated the badge-based reward system (Basic, Novice, Silver, Gold, Elite) to ensure proper milestone tracking and improved user engagement.
 - ✓ Collaborated closely with developers and product teams, providing feedback for continuous improvements in the application's functionality and usability.
- **Carelon Global Solutions** January 2022-March 2025
 - ✓ Quality Assurance Engineer
- **Project: Onboarding video will have Welcome Video and Benefit Details**
 - ✓ Conducted detailed reviews of onboarding video content to align with company messaging and policies.
 - ✓ Validated visual and audio elements for accuracy and synchronization.
 - ✓ Ensured cross-device compatibility, verifying correct playback on all platforms.

- ✓ Tested interactive features (links/forms) for seamless operation.
- ✓ Checked accessibility features to meet standards and ensure user inclusivity.
- ✓ Documented issues and worked with the team to ensure timely resolution.

➤ **Project: Rebranded Unicare to Wellpoint Brand**

- ✓ Created detailed test plans and cases specifically focused on the rebranding transition from UniCare to WellPoint, ensuring all branding elements were updated correctly and consistently across all systems.
- ✓ Performed thorough regression testing to confirm that the rebranding did not introduce any defects or issues in existing
- ✓ functionalities, and validated that all visual and textual elements reflected the new WellPoint branding
- ✓ Worked closely with development and design teams to address any issues discovered during testing, providing
- ✓ feedback and ensuring that all rebranding changes met the required quality standards.

➤ **Project: Personalization for Members on Dashboard**

- ✓ Designed and implemented a multi-layered architecture to enable member personalization, integrating database systems, Kafka event streaming, APIs, and user interfaces to ensure seamless data flow and real-time updates.
- ✓ Developed comprehensive high-level test scenarios and test cases, ensuring coverage of all system layers and edge cases to validate the flow and functionality of the personalization architecture.
- ✓ Validated the personalization system by ensuring data integrity and consistency across DB, APIs, and UI, testing event handling, API functionality, real-time updates, end-to-end flow, and performance, while covering edge cases and security concerns.
- ✓ Held regular meetings with stakeholders to provide project status updates and discuss potential changes and suggestions.
- ✓ Automated manual tasks to boost efficiency and reusability, including button, page, and functionality validations.

Education

Bachelor of Technology in Mechanical Engineering
Bheemanna Khandre Institute Of Technology

Strengths

- Analytical thinking
- Attention to details
- Adaptability
- Team oriented
- Effective communicator
