PERSONAL PROJECTS

Random Password Generator

- With growing technology, everything has relied on data, and securing this data is the main concern. Passwords are meant to keep the data safe that we upload on the Internet. An easy password can be hacked easily and all personal information can be misused. In order to prevent such things and keep the data safe, it is necessary to keep our passwords very strong.

Sales Forecasting and Trendline Analysis for Outlook India Magazine

- Estimating future sales based on historical data,market trends, and analysis of current business conditions by using regression analysis technique
