Professional Summary

Enthusiastic and detail-oriented Junior Software Tester with 3 months of hands-on experience gained through an internship in software testing. Proficient in manual testing, writing test cases, and identifying bugs across various stages of the software development lifecycle. During my internship, I developed a strong understanding of test execution, defect tracking, and working collaboratively with development teams to ensure the delivery of high-quality software. Experienced in using testing tools, following agile methodologies, and effectively communicating test results to improve product quality and functionality.

Technical Skills

- **Manual Testing:** SDLC, STLC, Bug Life Cycle, Functional Testing, Smoke, Sanity, Regression, System, End-to-End Testing, Test Planning, Test Case Design & Execution.
- **API Testing:** REST and SOAP APIs, Postman, HTTP Methods (GET, POST, PUT, PATCH, DELETE), Response Validation.
- **Database Testing:** SQL, DML Commands (INSERT, SELECT, UPDATE, DELETE), Aggregate Functions, Joins, Data Validation.
- **Automation Testing:** Selenium WebDriver, TestNG, JUnit, Page Object Model (POM), Data-Driven Testing using Apache POI, Web Locators (XPath, CSS, ID), Handling Alerts, Frames, Windows, Cross-browser Testing.
- **Agile-Scrum Methodology:** Sprint Planning, Grooming, Backlog Refinement, Daily Stand-ups, Story Point Estimation, Burn-up/Burn-down Charts, Release Management.

Professional Experience

Junior Software Tester (Internship)

ITESTER Private Limited | April 2025 - July 2025

Project: RiVirtual Real Estate

Project Overview: RiVirtual is a global real estate FinTech company operating in over 100 cities across five countries, managing more than 100 million square feet of assets. It offers AI-driven solutions based on the 4As Accessibility, Affordability, Availability, and Authenticity to optimize real estate investments and enhance market transparency.

Key Responsibilities:

- Review software requirements to develop comprehensive test plans and cases, ensuring thorough coverage of functional and non-functional aspects.
- Execute manual test cases and assist in developing automated tests to identify defects, usability issues, and performance bottlenecks.
- Document identified issues, report them to the development team, and track their resolution to ensure quality standards are met.
- Work closely with developers and other stakeholders to understand application functionalities and contribute to design and code reviews, focusing on testability and reliability.

- Employ tools such as Excel sheet Documents and Preparation of Documentation of Bug reports.
- Stay updated with industry trends and best practices in software testing, and contribute to enhancing testing methodologies and processes.

Training Project

Project: NopCommerce – E-Commerce Web Application

Project Overview: NopCommerce is an open-source, ASP.NET-based ecommerce platform used by online retailers to manage product listings, customer orders, payments, shipping, and more. The application supports multi-vendor and multi-store functionalities, making it suitable for both small businesses and large enterprises. The project aimed to ensure a bug-free and seamless shopping experience by validating core functionalities such as product search, user registration, cart management, payment gateway, and order processing.

Key Responsibilities:

- Analyzed requirements and functional specifications to design comprehensive test scenarios and test cases.
- Performed manual testing on core modules including user registration, product catalog, shopping cart, checkout process, and admin panel.
- Conducted functional, regression, smoke, and integration testing across multiple browsers and environments.
- Logged and tracked bugs using Jira, ensuring they were resolved within the development sprint timelines.
- Validated backend data integrity using SQL queries to cross-check order details and user information.
- Worked in Agile environment and actively participated in daily stand-ups, sprint planning, and retrospectives.
- Used Postman to test APIs related to order placement, login, and user management.
- Collaborated closely with developers and business analysts to understand feature enhancements and ensure test coverage.
- Prepared and maintained test documentation, including test case execution reports, defect logs, and final QA sign-off reports

Education

B. Tech in Computer Science and Engineering

Indur Institute of Engineering & Technology, Jawaharlal Nehru University Hyderabad

Aug 2019 - Jun 2023 | CGPA: 7.2/10

Certifications

- Kosmik technology – Software Testing Course Certification
